
FXpansion Maul V1.0.0.3-R2R

December 14, 2018 - March 14, 2013 . R2R 3/14/2013 WiN 40.3 MB OSX 11.3 MB/subtitles FXpansion is proud to introduce Maul: a multi-band distortion and tone shaping plugin. It is a continuation and update of Maul and is the first audio distortion tool in OSX. We wanted to create a tool that could easily and efficiently create distortions and effects that would otherwise take too long to create, record and edit. We also wanted to provide high quality distortion that would not greatly affect the audio quality, which is achieved using the multiband mode
