A dramatic confrontation broke out Wednesday at the University of California Berkeley as hundreds of anti-Trump protesters stormed into the plaza of Sproul Hall, chanting "No Trump, No KKK, No Fascist USA" and "Danger, Danger, Will Robinson" in reference to the science fiction movie. The crowd was confronted by a phalanx of police officers and several dozen flag-waving, pro-Trump counterprotesters, who alternately wore red "Make America Great Again" hats and formed a human wall as the angry demonstrators pushed and shoved, and at times, hurled water bottles at one another. The standoff at the center of the University of California's iconic, domed, Brutalist building lasted approximately 90 minutes as officers surrounded the two sides of the plaza. The word "order" was heard repeatedly, as well as orders to disperse and to clear the area. Police helicopters intermittently buzzed above the demonstrators. Several demonstrators were tear-gassed, and at least one person was arrested on suspicion of felony assault, according to Berkeley Police Department spokesman Sgt. Andrew Frankel. The situation was relatively peaceful until 5

What's New in the AutoCAD?

You can now save a copy of your AutoCAD drawings in the workspace. No matter what tools you use, when you are finished working on a drawing, you can now save it to a separate project folder. (video: 1:45 min.) An intuitive vertical navigation bar makes it simple to navigate your drawings. Many new tools to add 2D and 3D perspective views to your drawings. See drawing tools for a list of available perspective views. The text editor enables you to view, edit, and manage text in drawings. You can now use saved settings in other drawings and also import settings from other drawings. The AllDrawingTools dialog box in AutoCAD lets you quickly load all of your settings and your active drawing tools. You can now choose to display a custom view, such as a north-up, west-up, or orthographic view, in a new command, called "custom view". The view will be scaled and shown as appropriate based on the zoom level. The Measure and Modeling toolbar (pictured above) has been added. The AutoMate Modeling tool allows you to perform various aspects of 2D modeling, from the creation of layouts and placement of symbols to the definition of parameters and guidelines. See autoMate modeling and AutoMate Geometry Primitives. An improved drawing UI that helps you find and select objects more quickly. The 3D modeling tools now also support a graphics tablet with pressure-sensitive pen. When you open a 3D model, you can use the Pen or a mouse to work on the surface of the model. The improved 3D toolbar allows you to rotate and change the view of your 3D model. The Modeling tab in the ribbon lets you navigate and manage your 3D models, such as a Dassault Rhino model. You can now paint lines and polygons in 2D and 3D space and then move, rotate, or scale them as you draw. AutoCAD Viewport Labels allow you to choose the view that you want to see, such as North, South, Left, Right, Top, Bottom, Scale, Fit, and Fit Surface. You can choose to have some labels visible by default. See the new "Hide/Show Labels" checkbox in the Viewport Labels Options dialog box. The Web UI now supports horizontal scrolling and
