I am using the same AppId as the one I have uploaded before but a different version name - the code is MY_APP_NAME.app/MY_APP_NAME What am I doing wrong? A: I'm assuming you have uploaded to TestFlight first. If so, you need to turn TestFlight into public. If not, you need to set TestFlight to public. bib51}. The role of the specific inhibitor of NF-κB inhibitors merits further investigation to determine how this affects the importance of NF-κB in the induction of COX-2 expression in lung cancer [[@bib52]]. COX-2 has been implicated in the etiology of several inflammatory disorders including ulcerative colitis and rheumatoid arthritis [[@bib53],[@bib54]]. COX-2 has also been implicated as an important mediator of tumor-associated inflammation and cancer growth [[@bib55]]. Increased levels of COX-2 have also been documented in several human cancers including colon, lung, breast and pancreas. These observations suggest that modulation of COX-2 expression and inhibition of its activity may lead to the development of new strategies in cancer chemotherapy [[@bib56]]. The selective COX-2 inhibitors have been used successfully to treat inflammatory disorders and reduce the use of non-specific NSAIDs [[@bib57],[@bib58]]. The COX-2 specific inhibitors have proven to be more effective than non-specific NSAIDs in various animal models of experimental inflammatory and colonic cancer [[@bib59],[@bib60]]. The use of selective COX-2 inhibitors alone or in combination with chemotherapeutic agents are currently being evaluated in clinical trials for the treatment of breast and pancreatic cancer [[@bib61]]. Some of the most widely used and most potent COX-2 inhibitors include
