What's new in Elden Ring:

By combining the online system and the vast open world, we are aiming to create an "RPG that you spend only when you decide."

We have just made a new fast travel function, completely redesigned the world. New landscapes in a dense forest, Tarnished city, ancient space, and a peaceful 2D village have been created.

With this version, you also get three new specializations. You can choose which one you want to develop over time as a "Tarnished Specialist", or can choose to learn all the specializations in order to become a "Riser Specialist". The development of specialists can be done at the new NPC "Garland" you can find in some of the previously opened places.

Also, a new excitement is added to the previous event "The Tome of the Dusk" which you could only get through a pre-registration. Darkness surrounds the Town of Oblivion and a Drifting Chronicle telling the story of the Dusk Lord appears every day. By capturing the Drifting Chronicle as a temporary item, you can be able to view the story in the game world, and you can experience the new story line.

Also, the "Golden Ring Player" status has been added. In this status, all the equipment you have gained as a tester will grant you additional bonus XP. You can increase your skill level more easily by equipping with a variety of equipment you have obtained through your leveling up.

Various quests have been added, and you will experience new stories that appear randomly. You can get more reputation points, earn special stats, and set new records.

You can check out the new Earth Adventure portal.

Please look forward to it.
