are pleased to introduce that our team has
launched 1.13.11 edition.it is coming and it is
looking like what we are waiting. We are want
to give you some introduction about this new
version. We are attaching some new features
and bugs fixed. If you want to know about it
and if you want to know more about this new
update you can keep reading :- What's new in
this new update? User-Friendly UI We're tired
of being asked the same question over and
over again. That's why we've redesigned the
UI to be clearer and more intuitive. In
previous updates, we've hinted at some

changes in the UI, but this is the first real change. We've made major improvements to the bandwidth monitor. If you search online, you'll find that the one-liner "Our bandwidth monitor doesn't work anymore" has become something of a meme. We've also made improvements to the Wi-Fi keyboard. System Requirements The system requirements hasn't changed. Download Visit the download page and download the new 1.13.11 edition right away! What's new in this new update?
